Our professional team of technology consultants brings a wide variety of knowledge and skills combined with functional and industry experience to serve the high-demanding consulting and strategy planning needs of our clients. We are flexible to meet the diversity of your special requirements thus offering the services of our pre-qualified, experienced Information Technology consultants on both short-term and long-term assignments, from technical consulting helping your IT department in evaluating your current implementation and recommending enhancements, to evaluation and needs assessment, selecting the appropriate technology and tools, and decision that requires high level of recommendations prior to the purchase of expensive infrastructure product.

TLC has embarked upon a consulting philosophy that is widely in practice all over the world by offering a greater flexibility for small, mid-sized and enterprise organizations. TLC flex is based on hourly consulting services and are available into three categories that can be utilized as a part of organizations internal **Technical Review Committee** and **Technical Review Board**.

- TLC flex 15 hours of monthly consulting services
- TLC flex 30 hours of quarterly services
- TLC extended 45 hours of quarterly services

TLC flex services can help organizations in making decisions in collaboration of their IT management in the areas of the following technology discussions related to pre and post sales engagements.

You can select any three technology domains from the services list as a part of our TLC Flex IT Consulting Services.

- 1) Help in reviewing existing AIX and IBM Power Server Health Check policies.
- 2) Review clients AIX operating systems upgrade and migration plans.
- 3) Review AIX systems security policy components.
- 4) AIX and IBM Power Server - Best practices and standards.
- 5) Discuss with clients on their solutions based on AIX high availability and disaster recovery strategy.
- 6) Participate in clients Gap Analysis assessment meetings on installed IBM Power Server and Storage Subsystem strategy.
- 7) Impart technology workshops where client can choose any 3 units from the list of our six "Storage Technology Courses" and various hands-on "AIX Education and Training Courses".
- 8) Help organizations in conducting interviews for hiring technical infrastructure resources.

With these services, we are offering a comprehensive suite of IT services customized according to each client's unique requirements and environments, and effectively addressing most of the business challenges our clients face.
